The two 110 tph cement grinding systems, with their two-compartment separator mills and SEPOL® separators will be constructed at Lanka in the neighbouring district of Naogaon.

region. It will include a 285 tph roller mill for raw material grinding, a 25 tph roller mill for coal grinding, a raw meal silo and the kiln system, consisting of a 6 stage DOPOL® '90 with PREPOL®-AS calciner, a 3.8 m x 56 m rotary kiln and a REPOL® reciprocating grate cooler.

The plant is scheduled to start production in April 2007.

## Two **combi-grinding plants** for cement grinding at Akcansa Cimento Sanayii

Canakkale/Turkey. Akcansa Cimento Sanayii A.S. plans to convert two existing ball mills to combi-grinding systems. Polysius is to supply two POLYCOM® units, two STATOPOL C® separators and two SEPOL® separators.

Commissioning of the two new grinding plants is to start at the end of 2007. Each of the plants will have a rated output of 200 tph of cement with a fineness of 3,600 cm<sup>2</sup>/g according to Blaine.

## Follow-up order:

### Coal grinding plant for Bastas Baskent Cimento Sanayii

Ankara/Turkey. Six months after Bastas Baskent Cimento Sanayii (a member of the Vicat Group) ordered a 4,000 tpd kiln line, they have now contracted Polysius to supply a coal grinding plant.

The plant, which will have a throughput of 22 or 38 tph depending on the type of fuel, will consist of a tube mill with SEPOL® high-efficiency separator. It is to commence production as early as mid 2007.

### Cement grinding plant with **roller mill** for Sococim Industries

Rufisque/Senegal. Polysius is installing a complete cement grinding plant at Sococim Industries in Rufisque (the largest cement factory in West Africa and a member of the Vicat Group). A 120 tph roller mill is the core item of the plant, which is due to start operations in spring 2008.

### Cement grinding plant with **tube mill** for Keystone Cement Company

Bath, Pennsylvania/USA. Keystone Cement Company has purchased a new cement grinding plant from Polysius, consisting of a tube mill and SEPOL® high-efficiency separator. The grinding plant will have a rated output of 81.5 t of cement per hour at a fineness of 3,800 cm<sup>2</sup>/g according to Blaine.

El Cheliff/Algeria. ECDE – Entreprise des Ciments et Dérivés d'Ech-Cheliff, located between Algiers and Oran, has awarded Polysius the order to construct a turnkey cement grinding plant.

### Cement grinding plant with **two-compartment separator mill** for ECDE

Consisting of a two-compartment tube mill and SEPOL® separator, the plant is due to start production in summer 2007 with an output of 100 tph to 145 tph depending on the cement type and quality.
